

Tire Storage Management Application

A custom AppSheet application for managing tire storage operations, inventory, vehicles, documents, and reporting.

Built with AppSheet
Used in real operational workflows

Project Overview

This project was created to provide a simple and organized way to manage stored tires, monitor their status, and keep all relevant information in one place.

Key Features:

- Tire inventory tracking
- Vehicle assignment
- Search and filtering capabilities
- Storage status monitoring
- Dashboard and statistics views
- PDF document generation
- Centralized data management

Application Screenshots:

Examples of the application's interface, including dashboards, views, forms, and reporting screens.
